

### Thermoplastic Rubber Bumpers and Feet –

TPR feet offer an alternative to traditional rubber molded feet. These feet offer excellent resistance to ozone and aging with good resistance to most chemicals. They provide high traction, excellent shock absorption qualities and are non-marking. Their unique construction allows them to be riveted into place without distortion.

### Self-Fusing Silicone Tape –

Tape is catalyzed but uncured silicone that vulcanizes onto itself without the use of any adhesive. Tape has high voltage resistance, wide temperature range (up to 550° F) resists moisture, ozone and corona, can come with glass reinforcing and meets MIL-1-22444C, MIL-I-46852C type I and type II.

# MILLIONS OF ITEMS IN STOCK FOR IMMEDIATE DELIVERY!

## Vibration and Shock Mountings –

Metal to rubber mountings used to specifically isolate vibration, impact, shock and reduce noise. Mountings are ideal for a wide range of applications including use on electric motors, generators, fans, blowers, control panels, machinery, timing devices and air/water handling equipment.

## Well-Nuts / Jack-Nuts –

The well-nut threaded insert is a flanged neoprene bushing with a brass machine nut molded into one end. They are ideal for vibration isolation and shock dampening. The Jack-nut is an economical blind fastener which creates a permanent reusable threaded insert.

## Liquid Tight Strain Reliefs/Relief Fittings and Conduit –

The only line of liquid tight strain reliefs with flexible overlapping clamping splines and the patented recess and high performance seal. Typical applications include control cabinets, car washes, hot tubs, instrumentation, carpet cleaning machines, food processing equipment, robotics, underground cabling and process sensors.

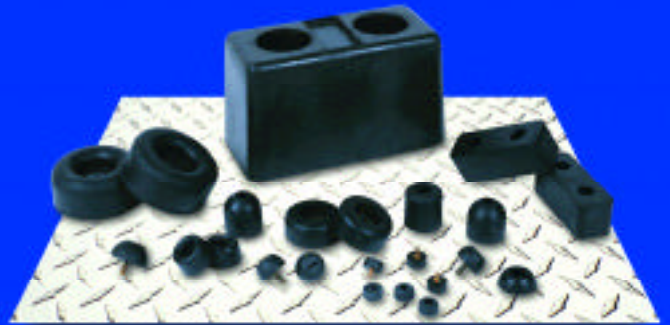

## Lathe Cuts –

A limitless variety of combinations of inner and outer diameters and cut wall thicknesses using both organic and non-organic materials. Applications include bumpers, rollers, washers, seals, rings, spacers, insulators, vibration isolators and impact & absorption pads.

## Rubber Grommets –

One of the industries most comprehensive inventories of standard tooling available with almost 600 sizes of rubber grommets cataloged. Commercial materials as well as MIL SPEC AN-931 series and MS-35489 series to meet MIL-G-3036 and MIL-R-3065. Custom compounding to meet individual customer or print specifications.

## Rubber Bumpers –

Recessed bumpers with and without metal washers, grommet bumpers, stem bumpers, bumper pads and strips, truck and dock bumpers, adhesive backed bumpers, bumper tips and caps, tac bumpers, brass machine screw extension bumpers as well as special vibration dampening bumpers. Molded to your material specifications.

**ESTCO**  
ENTERPRISES, INC.

"Engineered solutions through quality products since 1970."

An ISO 9002 certified Company

- Standard or Custom RUBBER GROMMETS
- Standard or Custom RUBBER EXTRUSIONS
- Standard or Custom LIQUIDTIGHTSTRAINRELIEFS/FITTINGS/CONDUIT
- Standard or Custom MOLDED RUBBER
- Standard or Custom THERMOPLASTIC RUBBER BUMPERS ANDFEET
- Standard or Custom RUBBER SUCTION CUPS
- Standard or Custom VIBRATION AND SHOCK MOUNTINGS
- Standard or Custom SELF-FUSING SILICONE TAPE
- Standard or Custom RUBBERLATHE CUTS
- Standard or Custom WELL-NUTS/JACK-NUTS

I have enclosed a print for a prompt quotation.  Please send me a catalog set.
